Capture Application is a fully configurable international address capture solution. From purchase to deployment, use this guide to get started.

Purchase

1 After purchasing Capture Application, you will receive two emails from noreply@experianmarketingservices.com.

The first one will contain your order details and a link to the **Self Service Portal**.

Once you have registered, the second email will notify that **Your Experian Data Quality Account** has been created. This email will contain your username (a temporary password will be sent separately).

Haven't received the emails?

• Check your spam folder

• Contact Experian Data Quality support »

2 To use Capture Application, you have to retrieve your token from **Self Service Portal → Licenses.**

You will also be able to generate additional tokens by clicking on **Get Token**.

Install

1 To download the Capture Application installer, log into the **Self Service Portal**.

2 Go to **Products → Capture Application**.

Prerequisites

You have to use the token to install Capture Application. It can be retrieved from Self Service Portal → Licenses.

The following software is also required on each machine that will be using Capture Application:

• Windows XP SP3 and above

• Windows Installer 4.5 and above

• Microsoft .NET Framework 4.6

• Windows Internet Explorer 8 and above

3 Click **Download Capture Application**. For assistance with the installation, see installation instructions »

4 Follow the **Configure** and **Test** steps on your own computer before installing the application for your users.

To distribute Capture Application on several machines at once, refer to silent installation ».

Configure

To configure Capture Application, go to **Products → Capture Application** and click **Configure Capture Application**. You will be able to add new and modify existing settings.

We recommend to bookmark the Capture Application configuration pages for quick access in the future.

Need help with your configuration?

Select **Show Help** from the drop-down box at the top of configuration pages for hints and tips.

Test

1 Once Capture Application has been installed on a computer, it can be accessed from the Windows Start menu, or by using the desktop shortcut.

Can't open the application?

Capture Application may be hidden. It can still be accessed at any time using a hotkey (the default is **Alt+Q**). To change or add hotkeys, see the **Configure** section.

2 With a Capture Application application window open, you and your users can perform address searches in a variety of ways, depending on the available options.

Search examples

For a guide to using the Capture Application application and detailed search examples, see the Address Searching Guide »

In-product help

In-product help is also available when **Hints & Tips** is activated. Select it from the drop-down box at the top of Capture Application Application window to display contextual help at the bottom of the screen.
